

## November 2 – Public Works – PW1

### Recent Developments and Trending Issues in Public Works

#### SPEAKER BIOS

**Mary Beth Coburn** is a partner in the San Diego office of Best Best & Krieger LLP. Ms. Coburn is also a California licensed professional civil engineer with over ten years experience in design and construction of public facilities, including positions with Los Angeles County Department of Public Works and several consulting engineering firms. Her primary practice area is public works and infrastructure construction law, including construction contracting and construction claims resolution. Her unique combination of "hands on" engineering experience and construction law provide clients with efficient, practical and comprehensive legal services. Ms. Coburn understands what it takes to get a project built and what delays and claims can do to that process.

Ms. Coburn specializes in assisting public agencies and private owners with all aspects of the construction process, involving preparation of construction documents, bid protests, subcontractor substitution and default, contractors' claims, stop notices, and project close out.

Ms. Coburn routinely works with municipalities, special districts and school districts on all issues related to construction of public facilities, from master planning through claims resolution. Often she assists clients with latent construction defects long after construction projects have been closed out and warranty periods have lapsed.

**Rebecca Chaparro** is an associate in the Special Districts practice group of Best Best & Krieger LLP. Rebecca received her law degree from the Sandra Day O'Connor College of Law at Arizona State University. During law school, she was a member of the Corporate & Business Law Society and Phi Alpha Delta and graduated with Pro Bono Distinction. She also served as a legal extern in the City Attorney's Office for the City of Scottsdale.

Prior to earning her law degree, Rebecca worked for a Phoenix general contractor specializing in commercial office and retail construction. She earned her bachelor's degree in housing & urban development from Arizona State University.
